

# Financial Scorecards for Family Businesses

## BENCHMARK THE FINANCIAL PERFORMANCE OF YOUR FAMILY BUSINESS YEAR-OVER-YEAR AGAINST INDUSTRY PEERS

Financial scorecards are a performance management tool designed to help family business owners and executives identify, track, and improve internal business metrics and their resulting external outcomes. This process will translate your company's financial statements into meaningful operational charts and graphs to aid in the interpretation of your company's performance. Financial scorecards can also provide insight into project, product, or service decisions while giving you a tool to clearly measure and monitor your progress toward strategic targets.

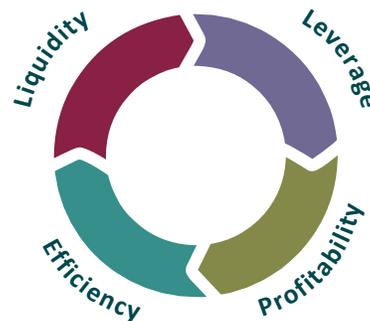

### FINANCIAL SCORECARD BENEFITS

- Promotes a greater understanding of your company's historical financial performance
- Provides real-time financial data and industry intelligence for your industry peer group
- Helps identify strengths, weaknesses, opportunities, and threats in financial performance
- Offers recommendations for improvement in financial metrics

### INFORMATION INCLUDED IN FINANCIAL SCORECARDS

Kreischer Miller's financial scorecards provide real-time financial metrics and trends for your business versus those of comparable companies based on your industry classification. Your financial scorecard will include:

- Historical analysis of financial performance
- Comparison to industry metrics
- An evaluation of 4 key financial metrics:
  - Liquidity
  - Leverage
  - Profitability
  - Efficiency
- Observations on areas of improvement based on variances from industry benchmarks
